

## Telangana presents 100 Force Traveller clinics to Animal Husbandry department

The initiative will help in providing preventive and curative healthcare to livestock at the doorstep of farmers and in turn will boost the rural economy.

Hyderabad: Around 100 [Force Traveller](#) vehicles modified into mobile veterinary clinics were delivered to [Animal Husbandry](#) Department by [Telangana](#) Chief Minister [K. Chandrashekar Rao](#) in Hyderabad.

This initiative will help in providing preventive and curative healthcare to livestock at the doorstep of farmers and in turn will boost the rural economy.

In the Telangana state around 24 lakh families are dependent upon the livestock sector for income generation and this dependency is increasing day by day. In order to take care of the large livestock population Telangana state government has taken measure steps at large scale.

The Traveller Mobile Veterinary Clinics will be stationed at strategic locations in order to minimize travel time and provide healthcare to the animals.

The staff of the Traveller Mobile Veterinary Clinic will visit villages and shall also be attending emergencies, besides the regular treatment and vaccination programmes.

Force Motors takes pride in introducing this Traveller Mobile Veterinary Clinic, which is customized to cater the need of extending healthcare services to the livestock.

Unique features of Traveller like Monocoque Body, Spacious cabin, Rear wheel drive, and optimum Ground clearance makes it an ideal vehicle for such utility. Traveller is the market leader in its segment.

The unmatched reliability of Traveller originates from the Mercedes derived driveline ensuring the promise of excellent reliability even on rough roads and thus makes it the best vehicle for operation in rural areas.

This unique vehicle comes with factory-fitted essential equipment like Examination Table, Medicine Cabinet, Oxygen cylinder storage, Oxygen delivery system, squad bench, seating arrangement for doctor as well as Lab technician, roof light to enable the treatment with adequate illumination.

This thoughtfully designed clinic is a one-stop solution to cater to the health problems of livestock, which reduces the need of veterinary dispensaries and is the need of an hour considering the growing rural economy.
