## FANTASY RIDES

SLICK AND STYLISH, THESE ARE SOME OF THE DREAM RIDES THAT ARE SHOWCASING THE FUTURE OF MOBILITY AT THE 2020 AUTO EXPO

**Mercedes AMG GT 63S**

The 4-door coupe is the world's fastest series production four-seater. It has a top speed of up to 315 km/h and sports a powerful 6-cylinder V8 engine that has a peak power of 639 hp. It follows the design philosophy of sensual purity and costs a whopping Rs 2.42 crore

**Renault Symbioz**

Echoing Renault's 'Zero Emissions' strategy, Symbioz concept comes with rear-wheel configuration, two electric motors located on the rear axle, and batteries housed beneath the floor. The retracting dashboard and pivoting front seats make it ideal for autonomous driving

**Great Wall Haval Vision 2025**

An electric SUV concept, it is Haval's vision of a smart, intelligent vehicle for 2025. It features face recognition, has next-gen and services, and aims to offer automated parking and advanced autonomous driving modes

**Maruti FUTURO-e**

This concept car shows what it is to be future-ready with a wide array of powertrain options like hybrid and pure electric. It is defined by its distinctive SUV-coupe silhouette. It features flexible swivel travel seats and console which give occupants unparalleled comfort

**Mahindra Funster**

A roadster electric concept with a playful convertible mode, it's quite unlike what Indian carmakers have generally churned out. It displays the bold new confidence of Mahindra in the future of mobility and its own design language

**Force Gurkha**

This is a customised version of the imposing vehicle that will surely appeal to the adventurous. An off-roading companion and a must for those in love with thrill and adventure

**Hyundai Kite**

A two-seater dune buggy concept that converts into a single-seater jet ski, it offers a different dimension to mobility and the flexibility that can be offered in vehicles
